## *New Varieties for 1937*

The following are the originators' descriptions.

**Anna Kaskas**

## LARGE FLOWERING

**ANNA KASKAS.** A large commercial variety producing full rounded closely incurved blooms 6 to 7 inches across when grown two blooms to the plant. Its color is a bright shade of golden-bronze. A good grower with excellent stem and foliage. Its habit of growth is vigorous, attaining a height of five feet. Select second crown or terminal buds Sept. 5th to 10th. Matures Nov. 1st to 5th.

\$15.00 per 100; \$125.00 per 1000

**PINK BERGEN.** Nice incurved pink coming into bloom about Oct. 10th-15th. A sport of Hilda Bergen blooming about two weeks earlier. An easier grower and heavier foliage.

\$15.00 per 100; \$125.00 per 1000

## POMPONS

**AUTUMN GLOW.** Growers of pot plants will welcome this introduction for its luminous color which immediately attracts attention. It is a glowing bright red on opening, changing to vivid bronze-red and remaining attractive for a long period. Flowers are 2½-3 inches across, quite double and of excellent texture. Plant is semi-dwarf, requires little pinching and particularly adaptable for pot culture.

\$15.00 per 100; \$125.00 per 1000

**AVALON.** A large flowered late Pompon, producing crisp blooms of coppery-orange on rigid well formed sprays. An excellent grower and producer, which matures for Thanksgiving and later. Its rich coloring, excellent spray formation and productiveness make this variety a welcome addition to the late flowering large Pompon group.

\$15.00 per 100; \$125.00 per 1000

**CARNELIA.** A late single of semi-dwarf but vigorous growth. Strong stem and excellent foliage. May be grown in sprays or disbudded. Its color is a bittersweet red and the date of maturity is from Thanksgiving into December.

\$15.00 per 100; \$125.00 per 1000

**Avalon**

**Carnelia**

**Chrome Emerald**

**POMPONS—Continued**

**CHROME EMERALD.** A late flowering Anemone Pompon with excellent substance and keeping qualities. Color, golden orange with gold cushion. An extremely free flowering variety producing many strong saleable sprays. Sturdy grower with excellent stem and foliage. Attains height of three feet. Matures the end of November into early December. This variety is excellent for pot plants, requiring no staking.

**\$15.00 per 100; \$125.00 per 1000**

**CORAL BLAZE.** Beautiful large Anemone suitable for disbuds. Color, coral-orange, the blooms averaging up to 6 inches across when grown 7 to 8 to the plant. Plant is vigorous in growth, producing strong rigid stems 40 to 42 inches high with leathery foliage. Matures in late November. An excellent and very attractive novelty for the retail grower.

**\$15.00 per 100; \$125.00 per 1000**

**EARLY YELLOW.** The earliest flowering yellow Pompon. Golden yellow sport of Early Bronze and identical to its parent in every respect except color. True pompon type, flowers about 1½ inches in diameter. Medium height. Blooms second week in September. Excellent as a pot plant and is equally good for cut when grown outdoors. Overwinters in well drained locations. Awarded First Class C. S. A. Certificate.

**25 for \$5.00; \$15.00 per 100**

Orders on Early Yellow limited to 100 per order.

**ESPY'S LATE WHITE ANEMONE.** This is the same in every way except color as Espy's Late Pink. For blooming from December 10th to January 10th. Can be disbudded 6 to a plant.

**\$16.00 per 100; \$150.00 per 1000**

**MRS. MARY HOOKER.** A vivid, striking, velvety crimson variety, ready to cut about November 15th. The flowers are large, of the decorative Pompon type, fully 3 inches across and are carried on strong branching sprays. Growth vigorous, attaining a height of 3 feet under good average culture. A first class producer with a color so rich that it appeals instantly to the market buyer.

**\$15.00 per 100; \$125.00 per 1000**

**RED MELBA.** Bright red sport of Melba. Holds its color whether disbudded or grown in sprays.

**\$12.00 per 100; \$100.00 per 1000**

Mrs. Mary Hooker

#### POMPONS—Continued

**ROSE MANDEL.** An incurved Pompon, making a nice pot 'mum. Deep lavender; as it ages it fades to a light lavender with white center. Nice habit and form of growth. Free breaking, each plant averaging 8 to 18 stems per plant. Strong stem. Select bud up to Sept. 5th. Matures October 10th-15th. Can be held for Thanksgiving.

25 for \$5.00; 50 for \$9.00; 100 for \$15.00; 1000 for \$125.00

**SCOTT'S EARLY SINGLE BRONZE.** A nice early bronze, valuable for Halloween decorations coming into bloom October 20th-28th. Resembles Ruth Adams but of course coming much earlier.

\$5.00 for 100; \$45.00 for 1000

**SUNBURST.** Good singles are becoming ever more popular with the retail trade. Sunburst is one of the very best singles in existence in almost every respect. Color is a brilliant shade of sunburst orange. The many petaled blooms are of good size and excellent substance, carried on very strong stems. An unusually healthy and vigorous grower with excellent foliage to the bottom of the plant. The variety is very productive and matures for Thanksgiving and later. Because of its productiveness and its growing habit which does not exceed 3 ft., it is excellent both for cutting or for pot plant.

\$15.00 for 100; \$125.00 for 1000

**WHITE ANEMONE.** A large pure white of Anemone type, superior to all others because of its snow-white cushion, size of flowers, the perfect spray formation and its numerous rows of glistening white guard-petals. A fast and strong grower. Flowers 4 inches in diameter when grown in sprays, and much larger when disbudded. Blooms normally late October into November. Responds well to shading for earlier blooming. May also be brought in bloom during December by delaying bud formation with additional light. White Anemone is exquisite for wedding work. Awarded First Class C. S. A. Certificate.

25 for \$5.00; \$15.00 per 100

**WHITE JEWELL.** This sport from Jewell grown normally is white, slightly tinted with pink. Under dark cloth it matures pure white. For the latter method, we consider it most useful.

\$12.00 per 100; 100.00 per 1000

A letter before each variety indicates, for quick reference, the season of flowering—early, late, etc. The date after each variety is approximate date of flowering.

E—Early. To get best flowers it is important to order early and plant early in May or June for best results. If buds are not formed on dates shown, reserve the first bud appearing after that date.

M—Midseason. When seasons are favorable, some of these will bloom a few days before November 1st.

L—Late. Late flowering varieties usually have best blooms about November 10th, if early buds are taken and the season is favorable. These varieties may be had for later blooming by selecting the later buds and planting later.

T—Thanksgiving varieties usually flower shortly before Thanksgiving, but can be held, in most cases for Thanksgiving sales.

"C.S.A. Certificate" is the award of the "Chrysanthemum Society of America."

For additional varieties of Exhibition Types, see pages 11 and 12.

## Anemone Types

This type consists of one or more rows of flat or tubular ray florets with shorter quilled disk florets. They may be grown either disbudded or in sprays according to which they are best adapted. This type of 'Mum is becoming more popular each year.

Pinch when small, allowing 4 to 6 growths to continue until buds are formed, then plants are disbudded to one flower to the growth.

PP—Indicates varieties which are also desirable for growing as Pot Plants.

See also group of Pot Plant varieties, pages 12 and 19.

## FOR POT-CULTURE

These varieties are adapted for pot culture. To keep plants dwarf, it is essential that they be pinched many times during the growing season until a few weeks before bud formation. It is not possible to give the exact date for pinching, but the flowering period should be the guide.

For additional list, see under Anemone, pages 17 and 18.

# Hardy Early-Flowering 'Mums

## FOR OUTDOOR GROWING

Commercial florists and the public are going in for these Hardy Pompons on a larger and increasing scale each year. We have listed a most complete collection of varieties to cover the entire outdoor blooming period until frost cuts down the blooms.

We have given approximate flowering dates as a guide for those who wish to group their plantings. Many varieties are desirable for rock gardens. Plants can be dug and replanted in window boxes, vases or other parts of the garden. Some varieties are desirable for culture under glass.

See separate list under **KOREAN HYBRIDS**, page 23, which are a new race of Hardy Outdoor 'Mums.

# GENERAL INFORMATION

---

**PRICES:** Prices are for rooted cuttings, which we believe to be more satisfactory than potted plants. Prices are subject to change without notice, also subject to crop failure.

**ORDER EARLY:** It is to your advantage to let us know as early as possible what you will want. Help us to help you by ordering early.

**OUR SERVICE:** We want to supply you the best varieties suitable for your business. Consult us. We will give you expert advice so far as we can. The information in this list regarding the date of taking bud, height of bloom and flowering dates and descriptions will be helpful to you. **Save this list for reference.**

**OUR RESPONSIBILITY:** We accept orders contingent upon our ability to have produced for us sufficient stock to meet the demands. All orders are filled in strict rotation. Orders will be filled as near the date desired by customers as it is possible to do so, bearing in mind that weather conditions and many other elements sometimes delay the growth of stock beyond human control. All orders are booked subject to crop shortages and crop failures. We agree to supply good stock, well rooted, packed in the proper manner and delivered to the express company or post office (whichever customer designates), after which the plants travel at buyer's risk.

**CLAIMS FOR DAMAGE:** All claims for damage must be made against the carrier by the buyer. We have no control over transportation agencies, and cannot be responsible for stock frozen, heated or injured by delays or rough handling. According to law, the transportation companies are the agents of the buyer and our responsibility ceases when we deliver stock in good condition to such agencies.

**NON-WARRANTY:** We do not warrant in any way, expressed or implied, the contents or the description, purity, productiveness or any other matter of any seeds, bulbs or plants sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof, and he must return them at once and money will be refunded. Subject to the above conditions, we make this sale at the moderate prices at which we sell our goods. All claims must be made in writing within five days after the receipt of goods.
